

Like other floor finishes, oiled floors must be maintained in order to provide maximum protection and luster and are meant to be periodically re-oiled. When properly cared for, a WOCA oil finished floor will last virtually forever and will never have to be sanded.

The following pertains to Reward Relica Woods Collection only. Please be sure to use the proper recommended care and maintenance instructions for your floor.

REGULAR MAINTENANCE

- Regularly vacuum or dust mop your floor to prevent sand or abrasive dust buildup that can scratch the floor finish.
- Wipe up spills and spots immediately with a damp cloth.
- One to four times a year, mop your floor with WOCA Oil Refresher. This will introduce a small amount of oil into the floor to freshen it and extend the time before a re-oiling becomes necessary. See website for more details.
- If cleaning more than four times per year becomes necessary, use WOCA Soap. Please remember to still mop with WOCA Oil Refresher twice a year. See website for more details.
- For commercial floors that require frequent cleaning, use WOCA Master Soap. The Master Soap is formulated to allow virtually daily cleaning without leaving behind residue, which may cause excessive buildup over time. Apply WOCA Oil Refresher three to four times a year.
- **Do not** use ammonia or oil-based wax, polish, household dust treatment chemicals, abrasive cleaners, furniture cleaners or any other non-WOCA brand product to clean your floor.
- **Do not** wet mop the floor, as excess moisture may cause damage to your wood floor.
- Only WOCA products should be used to clean your floor, which can be purchased from your flooring retailer.

PREVENTIVE MAINTENANCE

- Place high-quality floor mats and area rugs near outside entrances to prevent dirt, sand and other unwanted substances from being tracked directly onto the flooring. Also, if you have wood flooring in your kitchen, a throw rug with a soft or felt backing should be placed in front of the sink area to catch spills and splashes.
- Attach felt floor protectors on moveable furniture, including chairs, tables, sofas, etc. that sit directly on the floor.
- Keep pet nails trimmed and filed in order to minimize excessive wear.

TOUGH DIRT

Tough dirt may require using a solution of WOCA Wood Cleaner. For complete instructions on how to use the WOCA Wood Cleaner see website for more details. When using WOCA Wood Cleaner, it may be necessary to re-apply more WOCA oil.

REPAIRING SCRATCHES

Light scratches are best repaired by hand rubbing WOCA Master Oil or Master Color Oil on the affected areas using a cloth. If necessary, first clean the area to be repaired with WOCA Wood Cleaner solution. Be sure area is dry before applying oil. Leave the oil to absorb for a short period of time before thoroughly buffing and then removing the oil from the surrounding area. For more information visit www.woodcareusa.com/technical

Reference

NATURAL SOAP

Natural Soap is ideal for cleaning and maintenance of oiled, waxed and soaped surfaces. The oily Natural Soap forms a protective film on the floor. *Natural Soap white* is used for light wood species and *Natural Soap natural* for dark wood species. Natural Soap may be used for cleaning of most oiled floors.

Available in a handy .75L spray bottle or 1L, 2.5L, 5L bottles

OIL REFRESHER

Oil Refresher is used for regular cleaning and maintenance of oiled wood floors. Oil Refresher, Natural is typically used for natural oiled and colour oiled floors and Oil Refresher, White for white oiled wood floors. Oil Refresher combines efficient cleaning with re-oiling as addition oil is penetrating into the wood of the floor forming a mat protective layer in the surface.

Available in a handy .25L, 1L, 2.5L bottles

STAIN REMOVER

Spot Remover effectively dissolves grease, blood, coffee, tea etc. May be used on unfinished, soaped, oiled or waxed interior surfaces.

Available in .25L bottle

MAINTENANCE PASTE

After Master Oil, Master Color Oil or High Solid Master Oil has been applied, one or two top coats of Maintenance Oil Paste may be buffed into the wood floor. This oil gel comes in two colors, Natural and White, and contains 70 % solids. Maintenance Oil Paste can also be used for periodic re-oiling of floors. Due to its consistency as a gel, Maintenance Paste will provide slightly more buildup and sheen.

Available in a .4L tube
